SUMMARY

Aspiring Mobile and Web Developer with a passion for learning and building intuitive, responsive mobile and web applications. Novice in web development using HTML, CSS, JavaScript, Bootstrap, and PHP, android development using Kotlin, and cross-platform development using Flutter. I am a high school graduate, currently taking a bachelor's degree at Bina Nusantara University majoring in computer science, focusing in Mobile Application and Technology. I'm seeking internship opportunities to expand my skills as a developer. I thrive on challenges, enjoy solving problems like optimizing app performance, and aim to create seamless user experiences. I'm eager to collaborate with experienced teams to grow and contribute.

EDUCATION

BINA NUSANTARA UNIVERSITY — Bandung, Indonesia
Bachelor of Computer Science — Expected Sep 2026
Major in Computer Science; Streaming in Mobile Application and Technology
Cumulative GPA: 3.37/4.0
Relevant Coursework: Mobile Cloud Computing (Flutter), Web Design, Mobile Multimedia Solution (Swift), Software Engineering, Wearable Technology, Mobile Community Solution (Kotlin), Algorithm Design and Analysis, Object Oriented Programming, Database Technology, Artificial Intelligence, Data Structures, Algorithm and Programming, Program Design Method

PROJECTS

WEATHER APPLICATION | Android Developer
Github: https://github.com/samuelmeliala/WeatherApp_MCS — Feb 2024 - Jun 2024
- Technology used: Kotlin, Git
- Designed an android weather application using Kotlin
- Using API from OpenWeatherMap to get the weather data from the user's location
- Implemented version control system using Git

AR GIZIPEDIA | Unity Developer
Github : https://github.com/samuelmeliala/GiziPedia
Website: https://gizipedia.my.canva.site/ — Feb 2024 - Jun 2024
- Technology used: Unity, Vuforia, Git
- Developed an Augmented Reality app using Vuforia Packages with Unity Engine to show the healthy foods with nutritional facts through the AR app.
- Implemented version control system using Git

PORTFOLIO WEBSITE | Front-End Developer
Github: https://github.com/samuelmeliala/samuelmeliala.github.io
Website: https://samuelmeliala.github.io/ — Oct 2024
- Technology used: HTML5, CSS3, JavaScript, Bootstrap, Git
- Designed and developed a portfolio website using HTML5, CSS3, JavaScript, and Bootstrap to showcase my skills and projects.
- Implemented version control system using Git
- Successfully deployed on Github pages

BANBOO STORE | Fullstack Developer
Github: https://github.com/samuelmeliala/banboo_store — Oct 2024
- Technology used: Flutter, Node.js, Express, SQL, Git
- Designed and developed an e-commerce app using Flutter
- Using Node.js and Express to handle the back-end of the application
- Implemented version control system using Git

SKILLS

Technical Skills: Novice in Kotlin (Android Development), Flutter, HTML5, CSS3, JavaScript, Bootstrap, SQL Database, React Js, Node Js, React Native, Object Oriented Programming, Next Js, Git,
Languages: Native in Indonesian; Conversational Proficiency in English
Soft Skills: Teamwork, Leadership, Time Management, Communication, Project Management

ORGANIZATIONAL EXPERIENCE

Learning and Training Staff   Bandung, Indonesia
Bina Nusantara Computer Club (BNCC)   Sept 2023 - Present
- Become the Person In Charge for the LnT Front End Development Class, handling and managing the class well
